A GSU company

Call Before You Switch

Are you an @home Energy customer? Please read this notice carefully.

Recently, a number of our customers have been approached by door-to-door sales people falsely representing themselves to be affiliated with @home Energy, and persuading them to replace their water heaters.

Facts:

- @home Energy does not employ door-to-door sales people, nor are we affiliated with any company that does.
- Claims of increased efficiency and cost savings may be false.
- Although they may claim to offer you lower rates, @home Energy has investigated such claims and has found the monthly rates from such companies to not only be higher than our own, but to increase by 3.5% on an annual basis, year after year.

If a sales person approaches you, you are not obligated to provide them with any information or allow them into your home. Call @home Energy to speak to a representative before making any changes to your gas or electric water heater.

Be a well-informed consumer - before you switch - contact us !
